TO: **Whom Concern**

RE: **Network Engineering/ Sever mangment**

Dear,

I am excited to have the opportunity to apply for this position. I have always been fascinated by Networking, Windows Adminstrator and other Technologies like , Troubleshooting , tinkering with them and exploring their inner workings ever since I was a child. Learning to program opened up a whole new world to me, and I knew that I wanted to hone my skills at handling computer hardware and software to the highest level so that I could and devote my life to working with them. I believe that I have the determination and creative intelligence necessary to fit into the role of Network Administrator.

Though I have no formal experience as a Network Administrator, I have experience working as a back-end (Troubleshooting Networks) programming and setting up and configuring office networks. I am intimately familiar with Linux, Linux Server operating systems and Windows Server (2012 2016.).

Further More, I have also CCNA Certifications from **Cisco (**CSCO13671975**) and** also passed the New CCNA 200-301. High Technicality and more training of this field with passing these certification exams gave me considerable hands-on experience maintaining networks and running security checks on them.

Thank you very much for your time and consideration, and I look forward to setting up an interview. To be able to join the Crossover team and dedicate my programming abilities to solving stimulating and challenging technical problems would be a dream come true.

Sincerely

Fathi Omer

<h1 style="text-align:center">CURRICULUM VITEA</h1>

ABOUT ME

I am an enthusiastic and high-achieving Bachelor of Software Engineering, CCNA holder and Candidate of CCNP exam in this month. I have exceptional technical and analytical skills, with experience in Software Engineering, data analysis, database management, information system support, security, network and server support, business analysis, enterprise application integration, program configuration, testing and evaluation, which I have gained in various analyst/programmer roles.

Professional Experience

January 2019 To PRESENT: - **Technox Institute as a Trainer and Student**
